Phase 3: User Roles, Permission, Data Modeling & Relationships

Set up user roles and permissions

Now we'll configure user roles and permissions to control access to your evaluation system. Here's what you need to do:

1. Create Permission Sets:

- Go to Setup → Permission Sets → New
- Create these permission sets:
  - AASES Administrator: Full access to all objects
  - AASES Evaluator: Can read/write answer sheets and marking sheets
  - AASES Data Entry: Can only create and view answer sheets

2. Configure Object Permissions for each Permission Set:

For each permission set, set these object permissions:

AASES Administrator:

- AnswerSheet__c: Read, Create, Edit, Delete, View All, Modify All
- QuestionPaper__c: Read, Create, Edit, Delete, View All, Modify All
- MarkingScheme__c: Read, Create, Edit, Delete, View All, Modify All
- MarkingSheet__c: Read, Create, Edit, Delete, View All, Modify All

AASES Evaluator:

- AnswerSheet__c: Read, Edit (for evaluation)
- QuestionPaper__c: Read
- MarkingScheme__c: Read
- MarkingSheet__c: Read, Create, Edit

AASES Data Entry:

- AnswerSheet__c: Read, Create
- QuestionPaper__c: Read
- MarkingScheme__c: Read
- MarkingSheet__c: Read

3. Assign Permission Sets to Users:

- Go to Setup → Users
- Edit each user and assign appropriate permission sets
- System Administrator should get AASES Administrator
- Evaluators should get AASES Evaluator

- Data entry staff should get AASES Data Entry
